a Better Partner in your Growth

- Service and Training
232 Technical Support Staff

- Mitsubishi's Entire CNC System is the only to come with a full
3 Year Warranty*

*MC Mills and Lathes only

We bought our first Mitsubishi machine, a MV2400-S wire EDM in 2014. It has been a fantastic addition to our shop and exceeded our expectations. We therefore trusted WSM and Mitsubishi 1 year later when we purchased a new DM-800G Hard Mill/Graphite Mill. The machine accuracy has been excellent! We have logged over 3,600 hrs of electrode cutting in 3 years. In 2016 we purchased a DV1000 with 15,000 rpm spindle and followed that up with a second DV1000 in 2017. In May 2018 we added our 4th milling machine with another DM-800G. They really are a complete machine tool supplier.

Joe Flach (G.M. at Quadra Tooling & Automation, North Canton, OH)
