

GRAPHITE MILL - DM800-G

After 1 successful year with our new Mitsubishi Wire EDM machine, we gave Mitsubishi/MC Machinery and WSM the opportunity to show us what their DM800G Graphite mill could do for us.

Here again we departed from our current brand and selected the DM800G because of its price/accuracy Value Proposition now that we had experienced MC Machinery excellent Customer Support.

We cut 100's of electrodes a week to very tight tolerances +/- .0002". The machine has performed so well, with a much better tool life then ever experienced.

As a result we added another DM800G 2 years later. Both machines are running almost 20/ 6.

A great Value Proposition for smaller budget as compare to any other more expensive machines we investigated.
