

# UNIVERSAL MACHINING - DV1000

When it was time to acquire a new very accurate smaller machining center (+/- .0002”), because of our previous successes with Mitsubishi and WSM Technology, we purchased a DV1000 without hesitations.

For our third different type of machines in 4 years, we trusted again Mitsubishi/MC Machinery/WSM Technology. This machine, we now have two of them, has performed flawlessly from the day of their installation.

The machine ability to hold the very tight tolerance that we are expecting made this another excellent choice for our needs.
